## Achieve Results

*Proven* - LipoSan Ultra™ is a unique, patented product backed by solid laboratory and human studies that demonstrate the following:

- a. 3 to 5 times more Fat Binding - LipoSan Ultra outperformed all other varieties of chitosan in controlled laboratory testing.
- b. Proven Weight Loss - Our published double blind, placebo-controlled study involving 59 women showed significant weight loss (5 lb. differential over an 8 week period) that is directly attributable to LipoSan Ultra™ without the benefit of a reduced caloric diet or exercise.

*Fast Acting* - LipoSan Ultra is the only chitosan-based supplement that dissolves within 3 to 5 minutes in stomach acid to deliver maximum fat binding performance throughout the course of a meal.

*Convenient* - LipoSan Ultra's fast-action plus its high-density makes it easy for you to take a product that can deliver an effective dosage in 2 to 3 capsules and can be taken right at meal time. With our busy lives today, we no longer have to remember to take the product an hour before we eat. Incorporating LipoSan Ultra into your regular weight management routine will show positive results.

## Safe and Effective

LipoSan Ultra™ is a safe and effective weight-loss supplement that is Ephedra-free. LipoSan Ultra has been shown to reduce the absorption of dietary fats in in-vitro studies. It is even more effective when used in conjunction with exercise and a responsible diet.

In the digestive system, LipoSan Ultra binds to negatively-charged particles such as fats and oils you consume. Because LipoSan Ultra is a soluble fiber, that is not digestible, the fats and oils are bound by the LipoSan Ultra, they are prevented from being absorbed by the body. The LipoSan Ultra binds to the fatty substances and are safely excreted from the body.
